## ROBBERY PREVENTION TIPS

1. Keep in the cash drawer the smallest amount cash needed to operate and use a drop safe or similar robbery-resistant container to store excess cash.
2. Make bank deposits at least daily, vary the time and route, and use two people to deposits or use a courier service.
3. Do not allow unneeded cash to build up.
4. Place notices in prominent places on the premises which announce the cash protection procedures.
5. Arrange for maximum visibility of the cashiers counter from outside premises.
6. Provide initial and refresher training to store personnel concerning excess cash; post warning signs provide training on what to do when a robbery occurs.
7. Robbery is often committed with the aid of a lethal weapon and is accompanied by stress and fear on the part of the robber and the victim, thereby creating a potential for serious injury death.
8. Robbers may be under the influence of alcohol or drugs, and are likely to act violently.
9. The most vulnerable times for robberies are the closing and opening periods.
10. Robbers may visit an establishment one or more times to work out a plan.
11. Maintain liaison with local law enforcement, especially with those officers who patrol in the immediate neighborhood.
12. Install alarm equipment and CCTV, or capability to photograph a robbery in progress, post warning signs that such equipment is installed, and mount cameras so they will serve as psychological deterrents.

Note: These robbery prevention tips are made courtesy of the professionals at Executive Protection Specialist Inc.

Executive Protection Specialist Inc. would like thank you for allowing us to visit you and possibly provide such a service as ours. I guess you ask yourself “why” you should consider a business such as ours.

I want to be clear we do not sell fear, only facts. With home invasions, burglary, and armed robbery on a rise everywhere you should want what you work so hard for protected.

We all know once your homes or establishments have been violated you lose a certain sense of comfort. With the rapid growth of the cities and counties, the local Police Department and Sheriffs Office just cannot keep up with the demand on calls mainly alarm calls for homes or that presence for your sub division or business just to give you that sense of security.

**Fact did you know if your burglary alarm went off it will take between thirty to forty-five minutes for your local law enforcement agency to answer that call because dispatched calls are prioritized. If there is a more serious incident going on (i.e. robbery, murder, car accident) the alarm call is placed at the bottom of the list until an officer is free from a call. By the time of their arrival the burglar has ransacked your home and made off with your goods.**

What EPS Inc. would like to offer is a presence to detect and deter any wrong doing and provide a much productive and timely response time to your business or home. All breaking and entering happens between the hours of 8am to 5pm.

Allowing EPS Inc. to provide you with such a unique service you have:

1. Uniformed armed and foot patrol at your service.
2. Discounted insurance (EPS Inc. provides certificate for insurance purposes).
3. Monthly updates pertaining to crime stats during Homeowner Association Meetings.
4. High visibility presence.
5. Correspondence with Officer
